

# DISQUALIFYING MEDICAL CONDITIONS

**RT** RPAS  
TRAINING

## DISQUALIFYING MEDICAL CONDITIONS

- Angina pectoris
- Bipolar disease
- Cardiac valve replacement
- Coronary heart disease that has been treated or, if untreated, that has been symptomatic or clinically significant
- Diabetes
- Disturbance of consciousness without satisfactory explanation of the cause
- Epilepsy
- Heart replacement
- Myocardial infarction
- Permanent cardiac pacemaker
- A personality disorder that is severe enough to have repeatedly manifested itself by overt acts
- Psychosis
- Substance abuse
- Substance dependence
- Transient loss of control of nervous system function(s) without satisfactory explanation of the cause.

Whilst the above list is that of disqualifying conditions, please note that other conditions may need to be further evaluated should the DAME's officer require it. There are also temporary medical suspensions that can take place whilst a candidate is undergoing treatment and is advised that they are not fit to fly.

It is strongly advised that should a candidate have any ailments that they are concerned might hinder their medical certificate application, they are to please bring along the results given to them when the ailment was diagnosed so that the DAME's officer has all the information required at his/her disposal.

All information shared with the DAME's officer (Aviation Doctor) is confidential and neither the academy (RPAS Training Academy) nor the client may require details thereof. The DAME's officer will only inform us on the disqualification, further assessment if needed or that the candidate has passed.

As RPAS Training Academy is not a quailed Medical Practitioners and give this advice obtainable from SA-CATS-MR67 as per South African Civil Aviation Authority Regulation within the DAME (Designated Aviation Medical Examiner), we still strongly advise that the appropriate medical examiner be consulted for professional advice and feedback.
